JAGADISHWARAN R

Aspiring Data Analyst

+91 7358623264 | jagadishstarc@gmail.com | Chennai, Tamil Nadu| **LinkedIn** | **GitHub**

PROFESSIONAL SUMMARY:

Aspiring Data Analyst with a background in Human Resources and an MBA in HR & Marketing, transitioning into data analytics with hands-on experience in **Excel, SQL, Power BI, Power Query, and DAX**. Skilled in data cleaning, transformation, analysis, Visualisation, dashboard development, and generating business insights through practical analytics projects. Brings strong experience in HR operations, recruitment, and business processes, providing a valuable understanding of people and business data. Seeking a Data Analyst role to apply analytical and problem-solving skills, turn data into actionable insights, and support data-driven decisions.

CERTIFICATIONS:

Program in AI-Driven Data Analytics - Entri Software Private Limited **Feb 2026 - Sept 2026**

- Developed dashboards using Power BI and Excel.
- Applied SQL queries for data extraction and analysis.
- Performed data cleaning and transformation techniques.
- Completed real-world analytics projects and case studies.

SKILLS SETS:

Excel | SQL | Python | Power BI | Data Analysis | Data Cleaning & Transformation | Communication Skills | Time Management | Problem Solving | Teamwork

PROJECTS

Excel Capstone Project – E-Commerce Analysis | Project Link

- **Tools:** Microsoft Excel
- **Objective**: Analyse and prepare e-commerce data for accurate reporting.
- **Roles & Responsibilities**: Checked blank/null values, handled missing records, identified duplicate transactions, and reviewed logical inconsistencies/outliers.
- **Approach / Methodology**: Cleaned and standardised Order Date, Quantity, and Price formats; validated calculations and transformations. Key Features: Data-quality checks, duplicate handling, format standardisation, and validation.
- **Outcome / Results:** Improved data accuracy and reporting readiness through validated transformations.

Power BI Mini Project – Sales & Business Analytics | GitHub – Mini Project

- **Tools:** Microsoft Excel, Power BI
- **Objective:** Create an interactive sales and business analytics dashboard.
- **Roles & Responsibilities**: Cleaned and transformed business data, created data models, and developed DAX measures. Approach / Methodology: Handled missing values, duplicates, data types, and validation; then built the reporting model. Key Features: KPIs, charts, slicers, sales trend visualisations, and
- DAX-based business insights.
- **Outcome / Results:** Built an interactive dashboard and generated business insights; prepared documentation and screenshots

Logistics Dashboard using Power BI | Google Docs – Project Document

- **Tools:** Power BI, Power Query, DAX
- **Objective:** Analyse logistics delivery performance, revenue, and profit.
- **Roles & Responsibilities**: Imported and transformed data, created a data model, and developed DAX measures.
- **Approach / Methodology**: Used Power Query for transformation and developed the model and DAX measures for dashboard analysis. Key Features: Interactive dashboard covering delivery performance, revenue, and profit.
- Outcome / Results: Designed the dashboard and analysed delivery performance, revenue, and profit

Analysing E-Learning Platform Purchase Using MySQL| Google Docs – Project Document

- **Tools:** MySQL, Excel
- **Objective:** Analyze learner, course, and purchase data to generate business insights.
- **Roles & Responsibilities:** Created database tables, inserted and managed data, and wrote SQL queries for analysis.
- **Approach / Methodology:** Performed data validation and used SQL queries with filtering, sorting, joins, aggregations, subqueries, and grouping.
- **Key Features:** Course-wise sales, learner purchase analysis, revenue insights, and top-performing courses.
- **Outcome / Results:** Generated meaningful business insights from e-learning purchase data and documented SQL queries with results.

Employee Analysis Main Project– Main Project – GitHub

- **Tools:** Power BI, Python, Pandas, Excel
- **Objective:** Analyse employee data to generate actionable insights into workforce distribution, employee status, salary trends, performance scores, and remote work patterns.
- **Roles & Responsibilities:** Cleaned and transformed employee data, handled missing values and duplicates, standardised data formats, and developed interactive dashboards to analyse employee information.
- **Approach / Methodology:** Performed data cleaning and preprocessing, analysed employee records by department, region, status, and joining year, and used visualisations, aggregations, and DAX measures to calculate key workforce metrics.
- **Key Features:** Employee headcount, active employee count, department-wise and region-wise employee distribution, salary analysis, performance score distribution, employee joining trends, remote work analysis, and detailed employee records.
- **Outcome / Results:** Developed two interactive employee analytics dashboards to monitor workforce composition, salary distribution, employee performance, and remote work patterns, enabling data-driven HR and workforce management decisions.
